SUMMARY

Results-driven **Head of Software** and **AI-Focused Senior Solutions Architect** with nearly 8 years of professional experience building high-concurrency enterprise products, large-scale financial platforms, and distributed architectures. Expert in executing complex legacy migrations (from .NET Framework to modern .NET Core), designing microservices, and integrating local/cloud LLMs. Proven track record of leading multi-disciplinary engineering teams, reducing application latency by up to 60%, and delivering secure, production-ready systems.

TECHNICAL SKILLS

AI Engineering & Integration: LLM Orchestration, Local Model Hosting (Ollama/Llama3), Streaming AI API, Semantic Search, Embedding Generation, Microsoft.Extensions.AI
Core Languages & Frameworks: C# (.NET 10/9/Core/.NET Framework), Go (Golang), Java (Spring Boot), TypeScript, SQL
Architecture & Migration: Legacy System Modernization (.NET Framework to .NET Core), Microservices, Clean Architecture, HybridCache, Redis, Ocelot Gateway, RabbitMQ
DevOps & Platforms: Kubernetes (k8s), Docker, Docker Compose, CI/CD Pipelines, Nginx, Linux (Ubuntu)
Databases UI: PostgreSQL, SQL Server, MySQL, MongoDB, Angular 2+, React Native, Flutter, Dapper, EF Core

EXPERIENCE

Senior Full Stack Developer (via Venhancer) Jul. 2025 – Present
Anadolu Hayat Emeklilik (AHE) Istanbul, Turkey (Remote)

- Optimized the Corporate Branch System by re-engineering high-volume Excel import processes for IGES and GBBES bulk account openings, significantly increasing data processing efficiency.
- Spearheaded the migration of reporting modules to consume Nova APIs, improving data consistency and real-time reporting capabilities across the enterprise.
- Developed end-to-end GBBES approval workflows and user-friendly document upload interfaces within the AHESation project to streamline certification processes.
- Architected and implemented sophisticated proposal entry forms for agents and corporate representatives, enhancing the digital onboarding experience for new clients.

Head of Software Dec. 2023 – Jul. 2025
Forceget Supply Chain Logistics Miami, FL (Remote)

- Directly managed and mentored a cross-functional engineering team of 10+ developers, aligning software delivery with international supply-chain product roadmaps.
- Successfully led the architectural modernization and **migration of monolithic legacy .NET Framework applications to high-performance .NET Core / .NET 8**, eliminating technical debt and reducing infrastructure costs.
- Spearheaded transition into a decoupled **Microservices Architecture** using **RabbitMQ** and **Ocelot Gateway**, driving a **60% drop in service latency**.
- Optimized complex SQL interactions, database indexes, and caching strategies (**Redis**), boosting overall system processing capacity by **45%**.

Full Stack Developer Aug. 2023 – Dec. 2023
Forceget Supply Chain Logistics Miami, FL (Remote)

- Engineered core multi-tenant freight-forwarding functional modules with Angular, optimizing client-side state management and ensuring seamless integration with automated CI/CD pipelines.

Full Stack Developer Jul. 2021 – Jul. 2023
Alpata Yazılım ve Teknoloji Eskişehir, Turkey

- Architected and deployed highly-secure enterprise applications across multi-tenant servers utilizing **.NET Core** and **Angular**.
- Designed and pushed to production cross-platform mobile apps with **Flutter** and automated delivery via containerized **Docker** and **Kubernetes** topologies.

Full Stack Developer

Bilisim A.S.

Feb. 2021 – Jul. 2021

Ankara, Turkey (Hybrid)

- Embedded directly into the high-security core human resources application development team for **HAVELSAN**.
- Programmed deeply scalable and highly audited authorization modules using enterprise .NET Core architectures and optimized relational database schemas to withstand intensive data traffic.

SELECTED ENGINEERING PROJECTS

AI Core Enterprise Assistant (*.NET 10, Microsoft.Extensions.AI, Ollama, HybridCache, Redis*):

- Architected an enterprise-grade Web API demonstrating decoupled **Clean Architecture** layers.
- Implemented advanced AI capabilities including **Real-time Streaming AI Chat** workflows, parametric text generation, and **Embedding Generation** for semantic search systems.
- Optimized system performance using .NET 10's brand new **HybridCache** pattern, orchestrating a local L1 cache with a distributed Redis L2 cache layer.

NEC Ocelot Gateway (*.NET 9, Ocelot, Microservices*): Production-ready API Gateway template configured for secure cross-service routing, rate-limiting, and centralized token authentication.

EDUCATION

Inonu University

Bachelor of Science in Software Engineering

Malatya, Turkey

Sep. 2015 – Jun. 2020

LANGUAGES & CERTIFICATIONS

Languages: Turkish (Native), English (B2 - Professional Working Proficiency)

Driving Licence: Category B
