NECMETTIN CIMEN

Senior Full Stack Developer

+90 530 973 97 21 necmettin.dev@gmail.com necmettincimen.github.io
linkedin.com/in/necmettincimen github.com/necmettincimen

Summary

Results-driven Senior Full Stack Developer with over 9 years of professional experience designing, scaling, and maintaining enterprise-grade web applications, microservices, and cloud-native architectures. Proven track record of guiding cross-functional engineering teams, optimizing complex database structures, and deploying intelligent AI components. Expert in leveraging the **.NET Core** ecosystem, Node.js, and modern frontend frameworks to deliver resilient, high-performance systems that drive business value and maximize system uptime.

Experience

Senior Full Stack Developer (via Venhancer)

Anadolu Hayat Emeklilik (AHE)
07/2025 – Present — Istanbul, TR (Remote)
www.anadoluhayat.com.tr

- Architected and deployed highly responsive, enterprise-grade web interfaces utilizing **Vue.js** and **React** to streamline agent proposal processes, accelerating sales conversion rates by **25%**.
- Integrated advanced **AI components** alongside custom **no-code visual platform builders** to systematize complex insurance workflows, reducing manual customer onboarding times by **40%**.
- Built scalable backend microservices leveraging **.NET Core** and **Node.js** within multi-tenant cloud ecosystems (**AWS/Azure**) handling **10k+ concurrent requests**.
- Constructed unified, high-throughput API architectures including **GraphQL** and RESTful services to deliver real-time aggregated metrics for executive business dashboards.
- Spearheaded end-to-end system maintenance and cloud-native observability pipelines utilizing OpenTelemetry, Prometheus, and Grafana to ensure a 99.9% system uptime.

Tech Stack: .NET Core, Node.js, Vue.js, React, GraphQL, AWS, Azure, OpenTelemetry, Prometheus, Grafana, PostgreSQL, MongoDB

Software Team Lead

Forceget Supply Chain Logistics
08/2023 – 07/2025 — Miami, FL (Remote)
www.forceget.com

- Orchestrated an agile, multinational engineering team of 10+ professionals to plan and deliver high-traffic SaaS logistics platforms, boosting development sprint velocity by **35%**.
- Spearheaded the successful migration of legacy monolithic architectures into containerized microservices using **Node.js** and **.NET Core** on AWS.
- Authored and integrated high-performance **GraphQL** APIs tailored for high-frequency operations, resulting in a **60% reduction in end-to-end query latency**.
- Mapped complex relational structures in **PostgreSQL** and enhanced high-concurrency document stores in **MongoDB**, improving operational database performance by **45%**.
- Supervised platform health by establishing comprehensive monitoring, deployment support pipelines, and developer-friendly observability dashboards, **reducing critical system MTTR (Mean Time to Resolution) by 50%**.

Tech Stack: Node.js, .NET Core, GraphQL, MongoDB, PostgreSQL, Docker, Kubernetes, AWS, Apache Kafka, Redis, CI/CD

Education

Bachelor of Science in Software Engineering

Inonu University
2015 – 2020 — Malatya, TR

Skills

Backend & Cloud
.NET Core | Node.js | GraphQL | Microservices | AWS | Azure | REST APIs

Frontend
React | Vue.js | Tailwind CSS | JavaScript | TypeScript

UI Components & Libs
DevExtreme | Syncfusion | Telerik Kendo UI

Databases & Storage
MongoDB | PostgreSQL | SQL Server | Redis

Observability & DevOps
Prometheus | Grafana | OpenTelemetry | Docker | Kubernetes | CI/CD

Specialized Tools
AI Component Integration | No-Code Workflows

Projects

ai-core

https://github.com/necmettincimen/ai-core

Advanced AI integration core engineered in C#. Coordinates LLM API pipelines, smart agent reasoning workflows, and scalable prompt templates within **.NET Core**.

Full Stack Developer

Forceget Supply Chain Logistics
08/2023 – 12/2023 — Miami, FL (Remote)
www.forceget.com

- Crafted complex single-page applications using **React**, Redux Toolkit, and **Tailwind CSS**, delivering interactive dashboards that accelerated customer cargo booking speeds by **30%**.
- Compiled secure server-side controllers and integrated customized Express middleware for JWT-based authentication and secure high-throughput cargo routing pipelines.
- Structured robust schemas in **MongoDB** and PostgreSQL, ensuring efficient storage and quick retrieval of cargo tracking telemetry under heavy transactional loads.
- Refined RESTful and GraphQL endpoints to facilitate rapid frontend-backend data synchronization for real-time customer tracking dashboards.
- Managed containerized microservices using **Docker** and facilitated seamless staging deployments on **AWS** cloud infrastructure.

Tech Stack: React, Redux, Node.js, Express, MongoDB, GraphQL, Docker, AWS, RESTful APIs, Git, Tailwind CSS

Full Stack Developer

Alpata Software & Technology
07/2021 – 07/2023 — Eskisehir, TR
www.alpata.com.tr

- Provisioned, configured, and sustained multi-tenant enterprise architectures across AWS and Azure cloud environments using **.NET Core** and Docker containerization.
- Established analytical frontend dashboards utilizing **Vue.js** and React to empower manufacturing plants with real-time operations telemetry, leading to **20% better resource allocation**.
- Implemented secure, thread-safe asynchronous backend logic and enhanced relational SQL database queries, resolving inventory deadlocks during peak transaction periods.

Tech Stack: Vue.js, React, .NET Core, Docker, AWS, Azure, PostgreSQL, SQL Server, Redis

Full Stack Developer

Bilisim A.S.
02/2021 – 07/2021 — Ankara, TR
www.bilisim.com.tr

- Developed secure RESTful endpoints and modeled complex relational databases for military-grade HR software applications (**HAVELSAN**) using **.NET Core**, **improving database query response times by 35% and securely managing over 5,000 active personnel profiles**.
- Built highly modular, reusable, and accessible frontend views with React, executing structured unit and integration tests to ensure zero regression bugs.

Tech Stack: React, .NET Core, PostgreSQL, SQL Server, Swagger, Git

Full Stack Developer

Alpata Software & Technology
01/2020 – 01/2021 — Ankara, TR

- Maintained, refactored, and modernized legacy web architectures, executing seamless data migration paths to modern, highly maintainable **.NET Core** API services.
- Created scalable database schemas, indexes, and stored procedures, improving general ERP application performance and reporting speeds by **30%**.

Tech Stack: .NET Core, ASP.NET MVC, JavaScript, SQL Server, HTML5, CSS3

Software Developer

Enal Software Consulting
06/2019 – 11/2019 — Malatya, TR

- Conceptualized and implemented secure web-based billing modules and computerized PDF/invoice generation pipelines, **completely eliminating**

blog-api-golang

github.com/necmettincimen/blog-api-golang

High-performance Go REST API backend featuring Gin-Gonic, JWT authentication, PostgreSQL database orchestration via GORM, and interactive Swagger documentation.

nec-ocelot-gateway

https://github.com/necmettincimen/nec-ocelot-gateway

Lightweight API gateway built with Ocelot and **.NET Core** designed to unify distributed microservices. Manages centralized routing, JWT validation, and custom rate-limiting.

marvel-vuejs

https://github.com/necmettincimen/marvel-vuejs

Modern client application developed with Vue 3 and Vite, focusing on clean modular architecture, reactive states, and highly optimized SEO-friendly views.

marvel-app

https://github.com/necmettincimen/marvel-app

Cross-platform mobile application constructed using React Native, Expo, and Galio Framework, delivering high-performance interactions and dynamic data caching.

marvel-java-spring-boot

https://github.com/necmettincimen/marvel-java-spring-boot

Enterprise-grade Java REST API built with Spring Boot, Maven, Lombok, and H2 database, focusing on SOLID design principles and automated testing.

billing delay errors and saving 12% in monthly operational processing time.

- Compiled custom, lightweight JavaScript helper libraries to enhance UX/UI interactions, **boosting page load speeds by 20%** and facilitating clean integration with **10+** third-party REST APIs.

Tech Stack: JavaScript, TypeScript, ASP.NET MVC, SQL Server, RESTful APIs, Git

Software Developer

Tuga Technology

01/2017 – 06/2019 — Malatya, TR

www.tugateknoloji.com

- Collaborated in fast-paced Scrum teams to implement robust validation rules and core application workflows on C# .NET MVC architectures, **reducing data-entry validation errors by 40% and accelerating sprint delivery by 15%**.
- Formulated dynamic, fully responsive frontend views utilizing jQuery and CSS/Bootstrap, **improving cross-browser compatibility score to 99% and boosting mobile session duration by 15%**.

Tech Stack: C#, ASP.NET MVC, jQuery, SQL Server, CSS, Bootstrap
